Projects

Personal Portfolio

A portfolio is a compilation of academic and professional materials that exemplify your beliefs, skills, qualifications, education, training, and experiences.

Technologies Used: HTML, CSS, Bootstrap, javascript (https://vishwateja-thogari.vercel.app/)

Food Munch

Developed a responsive website for a Food Store where users can see a list of food items and detailed information about food item offers.
- Designed page using HTML structure elements like li, header, article, footer elements, and bootstrap components to show different website sections and bootstrap classes for responsiveness through the mobile-first approach.
- Implemented product YouTube videos by using Bootstrap embed and model components
  Technologies used: HTML, CSS, Bootstrap **(vishwafood.ccbp.tech)**

Simple Todos Application

Developed persistent todo application with CRUD operations to the tracklist of tasks
- The displayed list of todos with HTML list elements, styled todo list using CSS, Bootstrap
- Implemented todo crud operations by using JavaScript event listeners and updated UI dynamically by using JavaScript DOM operations.
- Used Arrays, Objects, and their methods during todo list CRUD Operations Persisted todo list state on page reloads using local storage methods.
  Technologies used: HTML, CSS, JS, Bootstrap, ReactJs **(https://iuhbcxs.ccbp.tech/)**

IPL Dashboard

Developed a mini Chatbot Application that initially wishes to the user and responds to a user if the user input matches
to list of answers that the chatbot maintains

- Displayed conversation between user and chatbot using HTML list elements, styled using CSS, and Bootstrap.
- Displayed user input message using HTML form input element and reply from the chatbot dynamically in the UI by using JavaScript DOM Operations and Array push method. Implemented response from Chatbot by using the Array filter method.

Technologies used: HTML, CSS, JS, Bootstrap, ReactJS   (**https://appilp.ccbp.tech/**)

BooApp

- **Username: rahul**
- **password: rahul@2021**

If you want to get started with React, developing a simple messaging app can be a good starting point, especially if you want to keep things easy and simple. You can develop a bare-bones real-time chat app in 1 hour or take more time to add more functionality to it, such as user authentication. With React, you can create a simple yet attractive UI for your chat app. The messaging app should allow users to send and receive messages in real time.

Technologies used: HTML, CSS, JS, Bootstrap, ReactJS   (**https://BooApp.ccbp.tech**)

MEN'S STORE

Developed a responsive website for the Men's Store where users can see a list of clothing items, detailed information about clothing items, and offers. Designed page using the following HTML structure elements like li, header, article, footer elements, and bootstrap components to show different website sections and bootstrap classes for responsiveness through the mobile-first approach. Implemented product YouTube videos by using Bootstrap embed and model components

Technologies used: HTML, CSS, Bootstrap   (**http://vishwashoe.ccbp.tech/**)

Hobbies

- Listening to Songs
- Reading Books
- Playing Cricket
